### *OVERVIEW*

We look forward to another school year of serving our families. Please let us know if you have specific areas of learning you would like us to incorporate. Our focus is on life skills, integrity and resiliency. We incorporate these areas into genres on a rotating basis. They include STEM, Arts, Social studies, Service, Literacy, Drama and of course daily physical activity. At the sites, you can also let the staff know if you want them to absolutely start their homework there.

Please give your child's schedule to their teachers. We do not have the capability to keep them informed as things change. We will give them a roster once class lists are available of which children are registered with us but that does not tell them which days they will attend.

### *SNACK*

We have just been informed that due to storage issues at the schools we can no longer use their commercial refrigerators. The solution we have at this time is to have parents send a snack with their child if they desire. We will provide the time for a snack and of course will keep water to refill their water bottles as well. We will have crackers for an "emergency" We are so sorry for this inconvenience as we always tried to serve nutritious snacks. There are positives with this situation- you control what your child is served and it will help offset the costs of the minimum wage increase of \$1 per hour in January.

### *SPECIFIC SITES*

For students taking the bus from another school we will inform you as soon as they let us know which bus it will be.

The program at Agua Caliente will be held in the portable as you drive into the campus in the room on the South

side (up the ramp).
